APAN GIS Exercise Cycle Support

Initial Planning Event
"Establish Requirements"

Final Planning Event
"Finalize Plan"

Inform the APAN team of the intent to use Portal and their goals of the apps that will be used.

Initial orientation to cover app GIS tools/options

After orientation users identify which tools they plan to use

Training on those identified tools so user can begin building

Provide training to additional users if necessary

Adjust products that were initially created to meet newly refined requirements

Train users on the advantages of using a Group Structure to share apps/data

Refine requirements with APAN Team

Pre-execution (NLT D-7)
Provide all names of users and roles

Provide any IP addresses that will be utilized in an off-site location for white-listing

Upon completion
Any data that is needed for preservation should be no longer shared and taken offline IAW APAN Data Retention Policies

Mid Planning Event
"Refine Requirements"

All Partners Access Network www.apan.org

Exercise Complete

Cycle begins again
